## Rhino-Rack Sunseeker II Base Tent (32119)

**Important:** Please read these instructions carefully prior to installation.  
Please refer to your fitting instruction to ensure that the roof racks are installed in the correct locations.  
Check the contents of kit before commencing fitment and report any discrepancies.  
Place these instructions in the vehicle's glove box after installation is complete.

### Layout

### Important Information

#### Recommendations:

- 1 - Select a flat location to park the vehicle with enough room beside the car to set up the Sunseeker Awning.
- 2 - Set up Sunseeker as per the instructions associated with it.
- 3 - Check ground is free from debris that could damage the floor of the base tent. Now follow the instructions for the Base tent setup.

**Note:** You cannot move your vehicle once the Sunseeker and Base Tent are set up.

A stand alone kit containing poles, pegs and ropes can be purchase for tent setup without the Sunseeker Awning.

#### Care Instructions:

To remove marks, use a soft brush or sponge with fresh water and a mild detergent only. Rinse with a fresh clean water. Allow to dry thoroughly before packing away. Never pack away damp, dirty or wet.

#### Materials:

Tent - Polyester 65%, Cotton 25%.

Base - PVC 350grams.

#### Tools Required:

Rubber Mallet

### Instructions

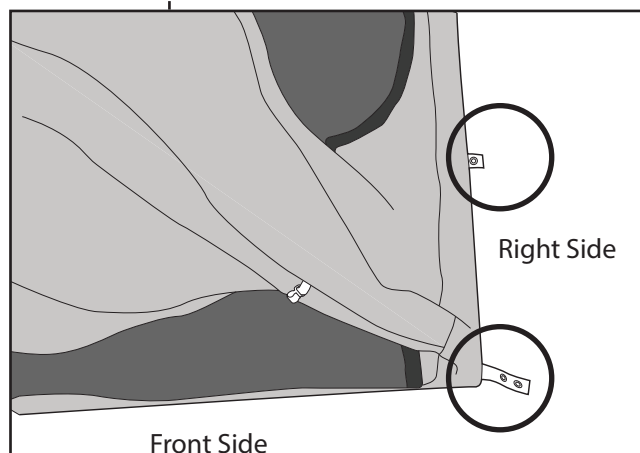

- 1 Remove the Base Tent from its carry bag and place under the opened Sunseeker. Face the 'U' shaped doors perpendicular to the vehicle. The 'D' shaped side doors will run parallel to the vehicle.

'D' shaped doors run positioned at the sides

'U' shaped doors positions perpendicular to the vehicle.

Hooks face away from vehicle.

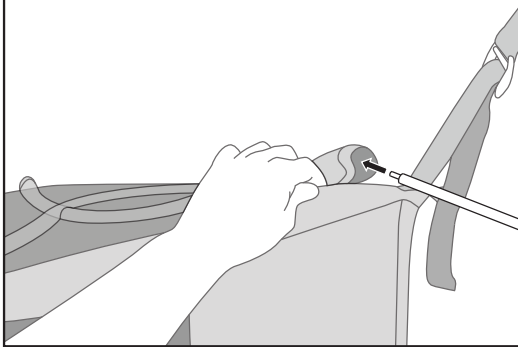

**Top View:** There are two tabs close together at the front of the tent on both the right and left sides. Use these to orientate the tent for setup.

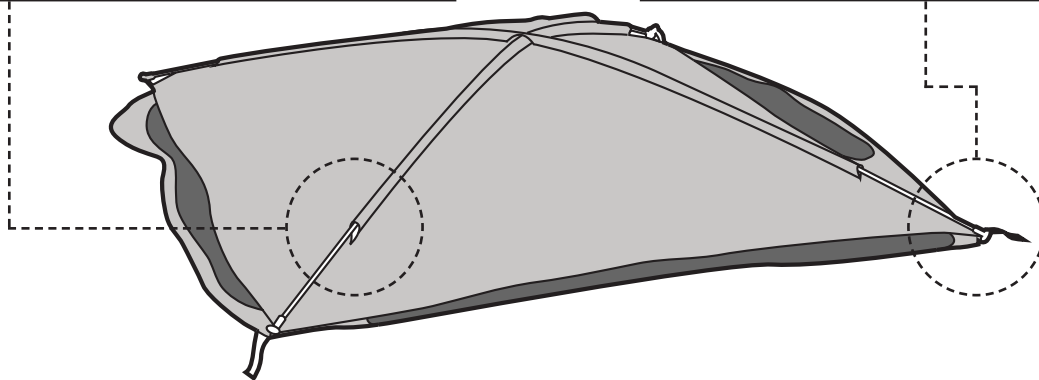

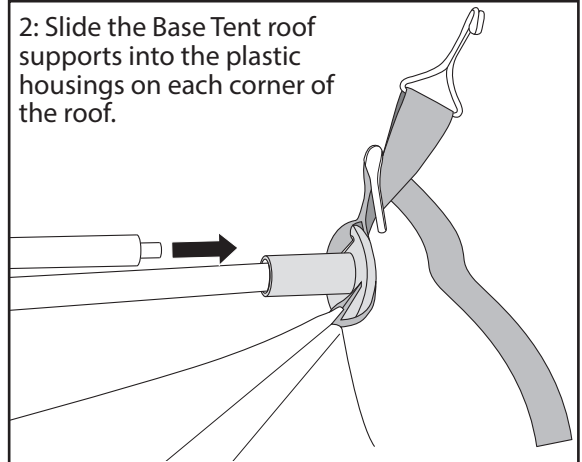

## Rhino-Rack Sunseeker II Base Tent (32119)

- 2** 1: Slide the Base Tent roof supports through the material tubes found running diagonally atop the tent.  
2: Insert the ends of the poles into the plastic housings, this will raise the roof of the tent into a 'dome' shape.  
**Note:** The poles will have a natural curve when fit together.

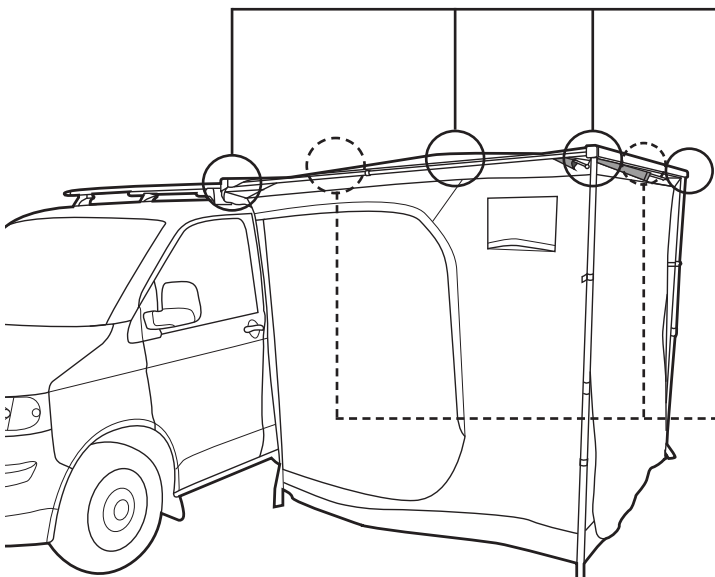

1: Slide the Base Tent roof supports through the material tubes. Use care when doing so as to not damage the tent.

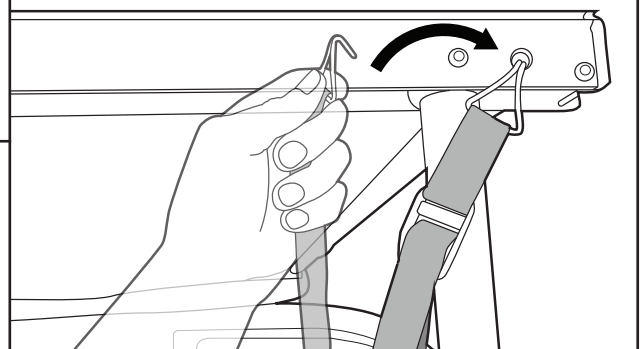

2: Slide the Base Tent roof supports into the plastic housings on each corner of the roof.

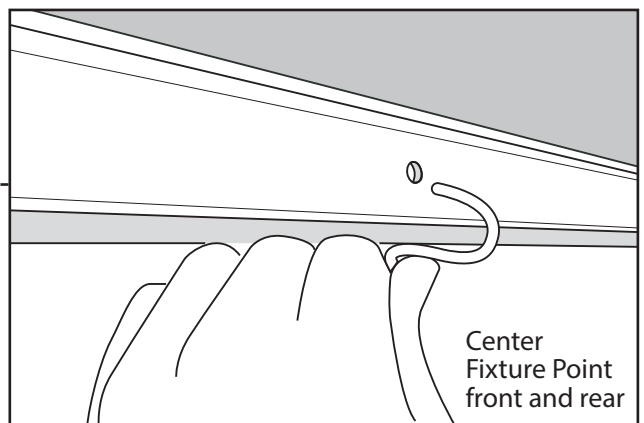

- 3** With help lift the tent up and clip the fixture hooks into the holes on the Sunseeker. There are six fixture points in total, one in each corner and one found in the centre of the front and rear of the awning.

## Rhino-Rack Sunseeker II Base Tent (32119)

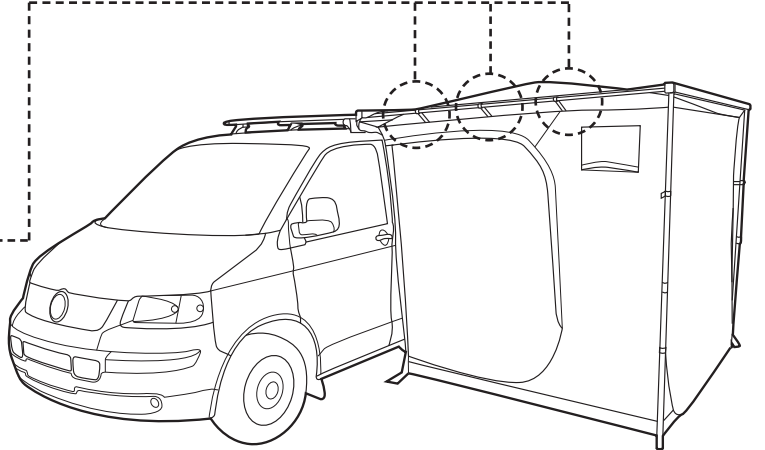

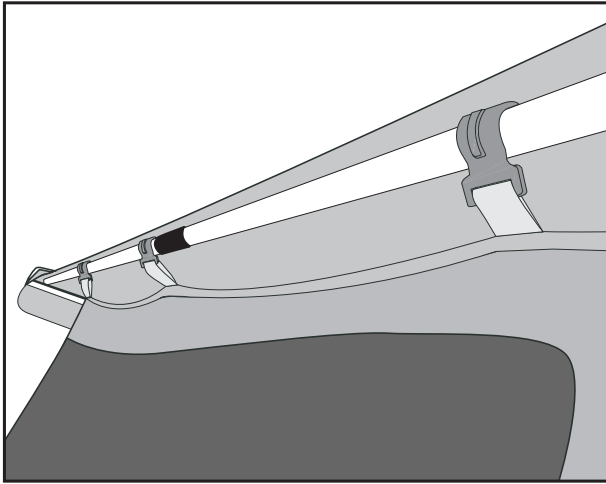

- 4** Attach the front Base Tent clips to the support arms of the Sunseeker.

Listen for an audible 'click'

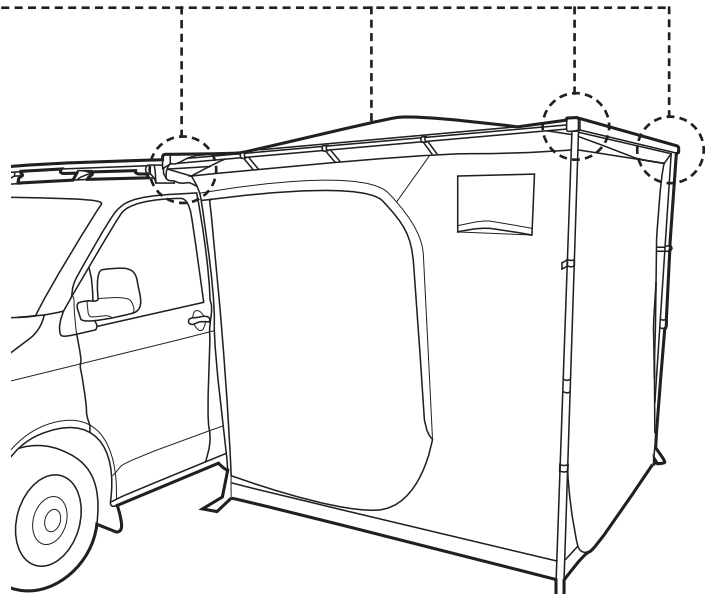

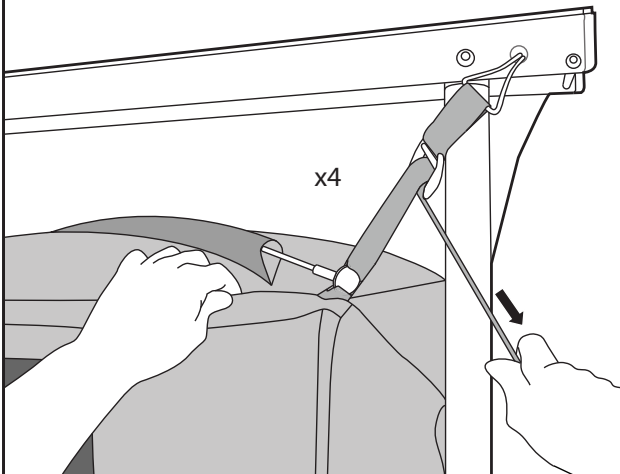

- 5** Attach the Base Tent front clips to the upper support arms of the Sunseeker, located on both sides.

- 6** Pull taught the support hooks evenly on all four sides.

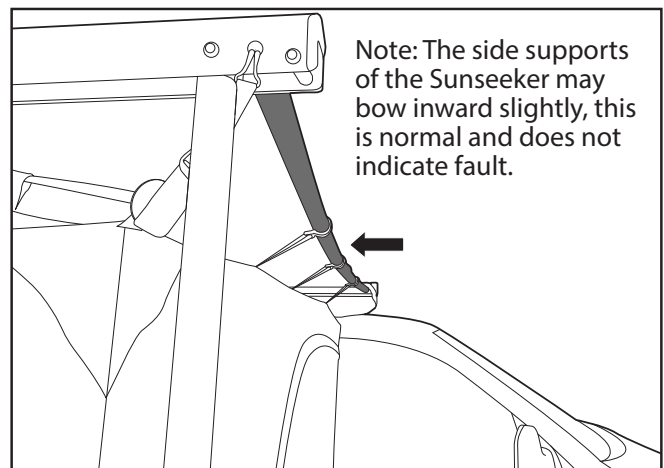

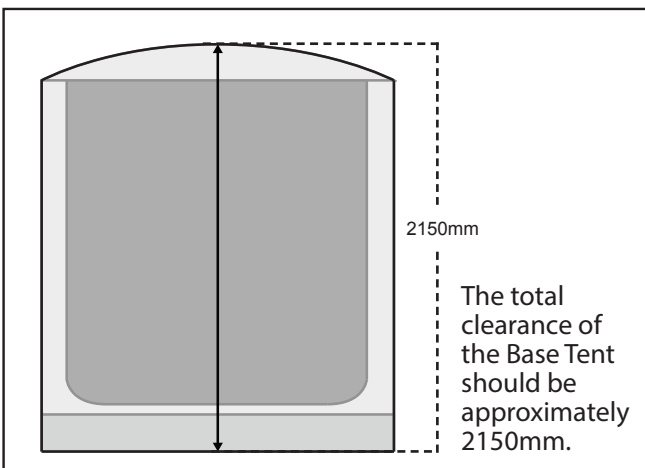

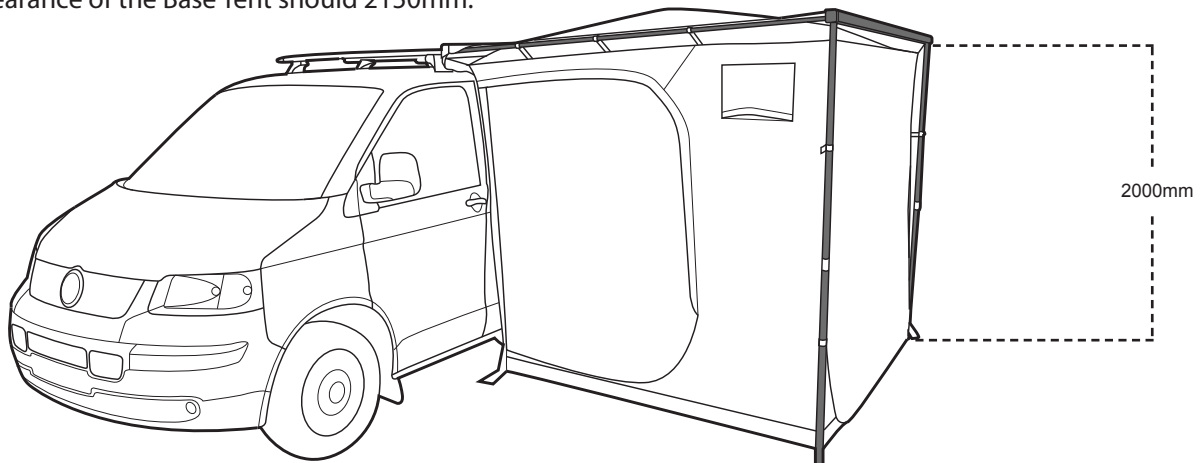

Pull the straps taught as shown. This will secure the upper support poles.

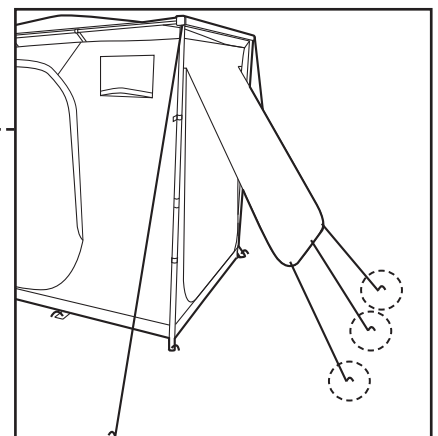

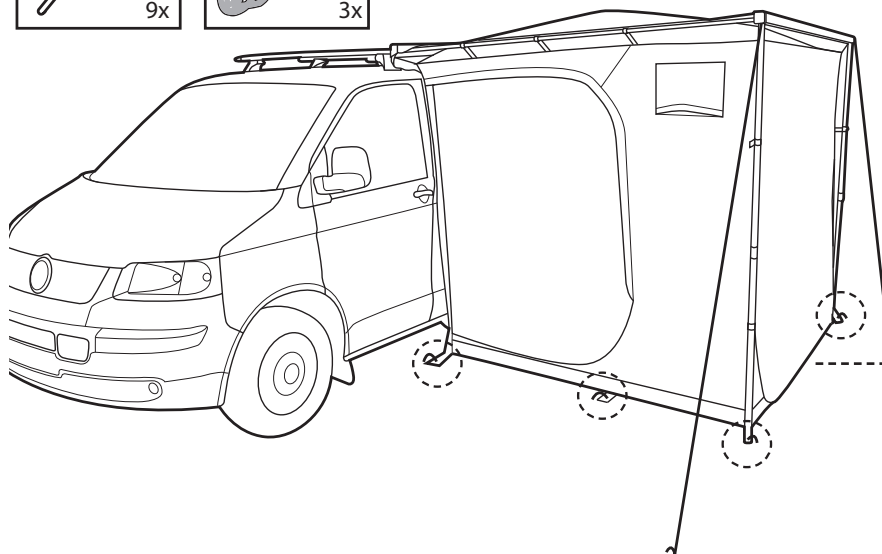

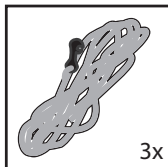

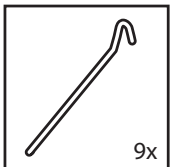

## Rhino-Rack Sunseeker II Base Tent (32119)

- 7** For ideal setup, have the Sunseeker set to a height of 2000mm. With the Sunseeker adjusted to height the total Clearance of the Base Tent should 2150mm.

- 8** Using a rubber mallet, secure the tent with the metal pegs and guy ropes provided.

The Front Door can be pegged out on an angle allowing ventilation while keeping a level privacy.

Use the guy ropes from the Base Tent kit on the Front Door. The Sunseeker will have its own ropes to fix it in place.

## Rhino-Rack Sunseeker II Base Tent (32119)

### Features

#### Features:

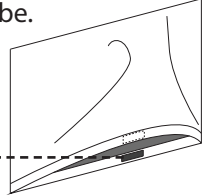

**Power** - DC power cords can be passed into the tent through a zippered flap in the rear bottom corners of the tent. This will allow power to be directed inside the tent while minimising possible issues caused by the elements.

Velcro tabs within can be used to house Rhino LED lighting bars and run power cords safely.

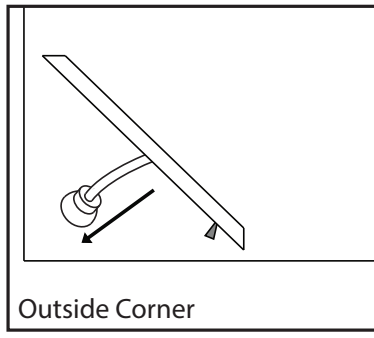

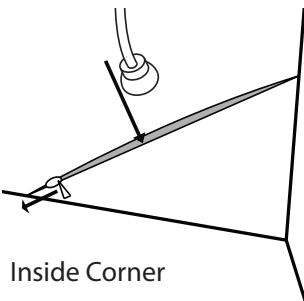

**Storage** - A Mesh Panel can be fitted to the ceiling providing a safe and easily accessible storage area.

Vents are situated on both sides allowing proper airflow even if all doors are shut. Velcro tabs on both vents ensure they can be closed if need be.

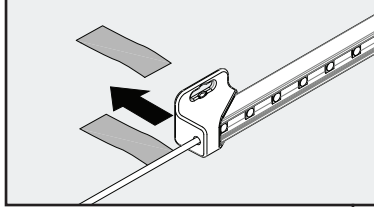

Velcro Tabs

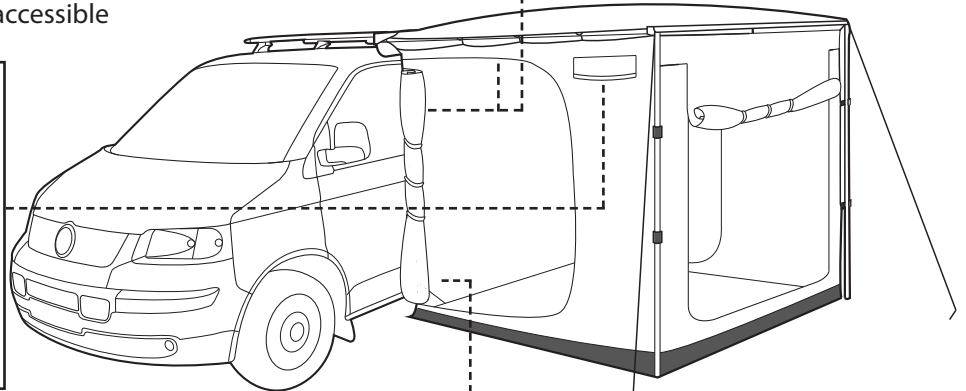

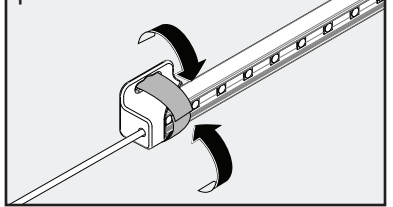

Power Cords can be passed through the tent using the zippered opening in the bottom rear corners.

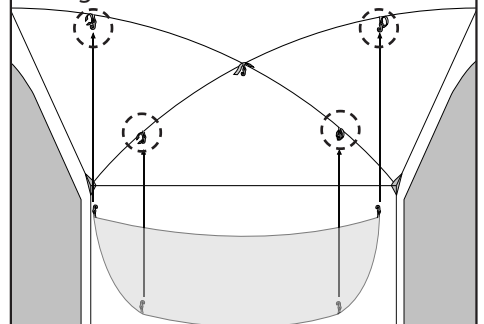

1: LED Lights can be fitted to the sides and roof of the tent using the velcro tabs found within.

2: Connect the velcro tabs around the LED Lights or power cords to fix them in place.

Inside, Roof: Fit the mesh panel to roof as shown. This will provide added storage.

#### Base Tent Extensions:

**Tag-A-Long Tent** - Extend the Base Tent with an extra room. The Tag-A-Long Tent can be attached to the front of the Base Tent, extending the living space provided.

**Sunseeker Extension Fly** - A reflective fly can be zippered into the Sunseeker, providing added sun and rain protections.

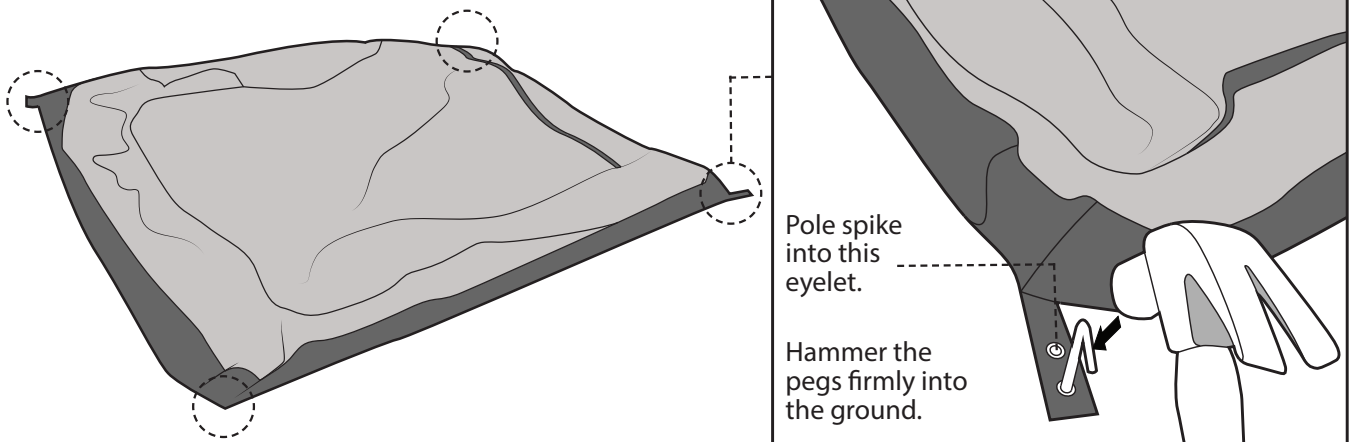

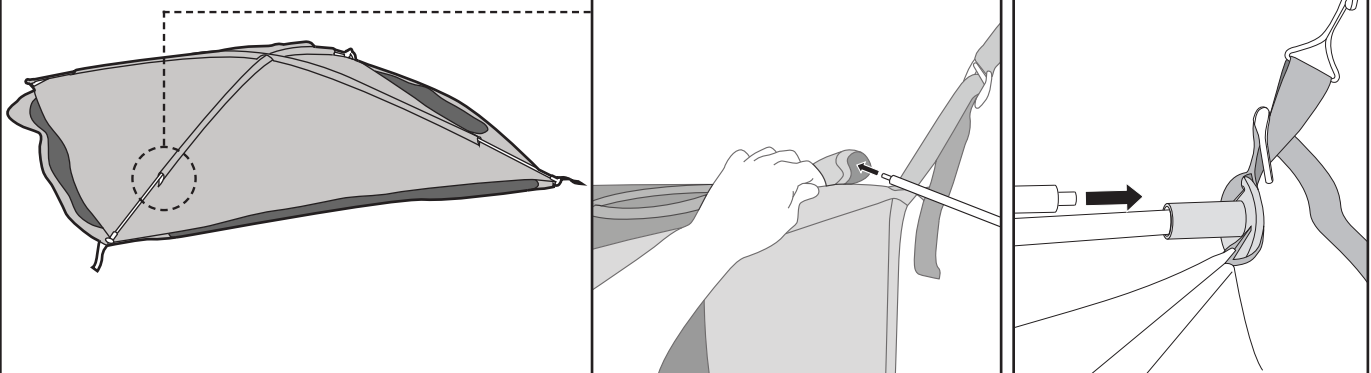

## Rhino-Rack Sunseeker II Base Tent (32119)

### Stand Alone Kit (32124) sold separately

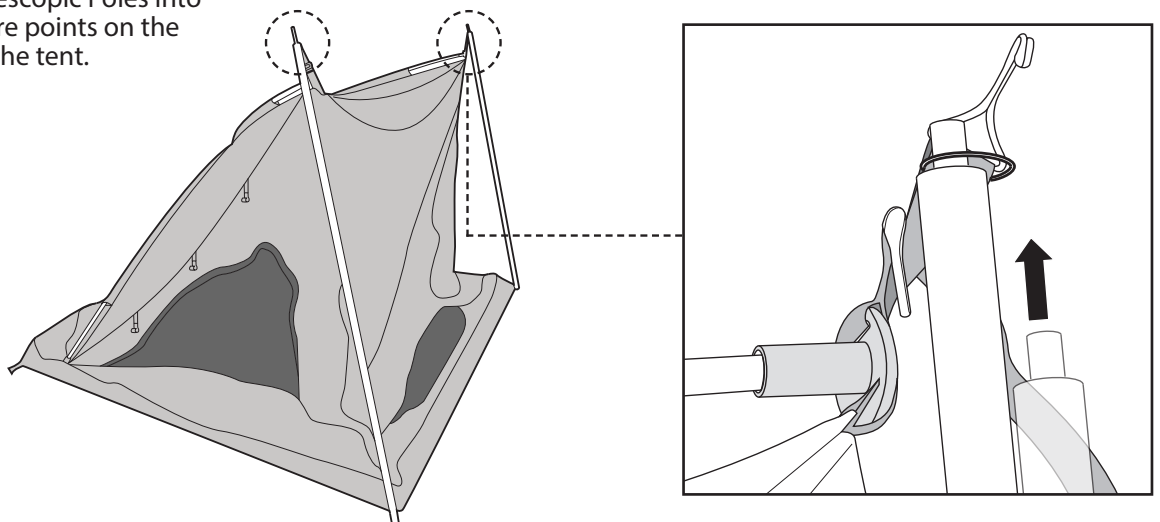

- 1** Fix the four corners of the Base Tent to the ground using the metal pegs.

- 2** Insert the Upper Support Poles into the material tubes on the roof of the tent. **Note:** Support Poles included in Base Tent Kit.

- 3** Insert the Telescopic Poles into the ring fixture points on the front side of the tent.

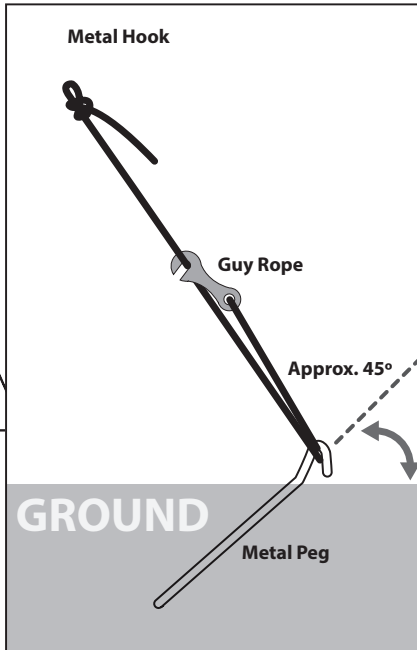

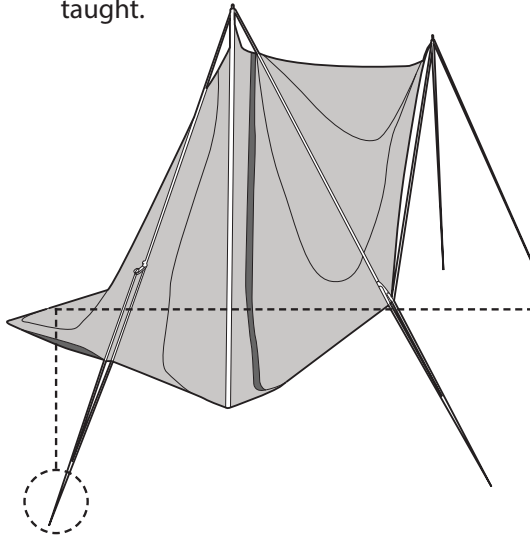

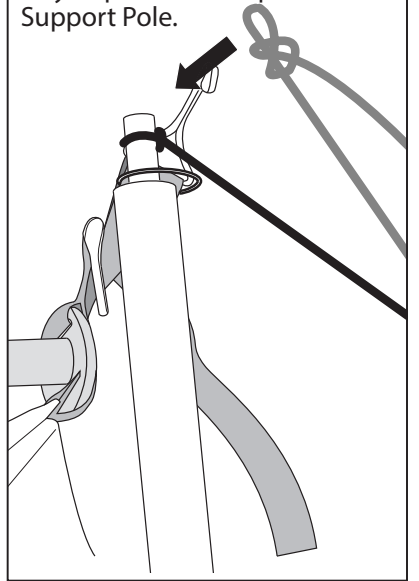

## Rhino-Rack Sunseeker II Base Tent (32119)

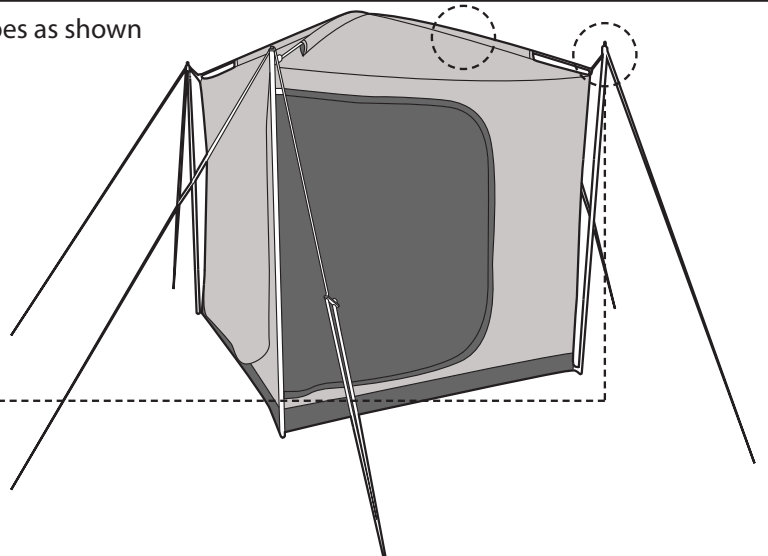

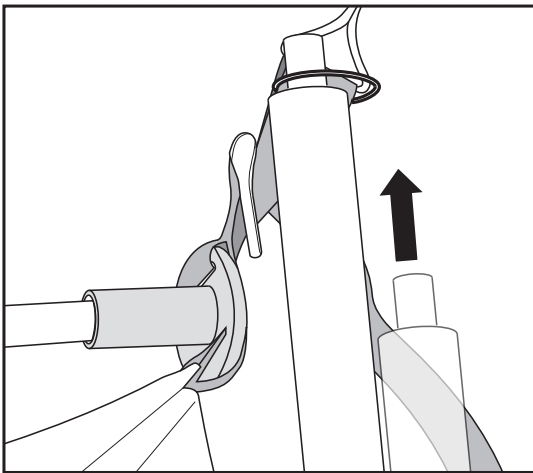

- 4** Using the metal pegs provided, fix four Guy Ropes to the ground. Now attach the ropes to the top of the support poles as shown. Be sure guy ropes are taught.

Slide the looped end of the Guy Rope over the tip of the Support Pole.

- 5** Install the final two Support Poles and Guy Ropes as shown previously.

- 6** Attach the Base Tent clips to the Support Poles. Check all Guy Ropes are secure before use. Peg out last two positions below doors.
